(54) Title: SECURE SESSION SET UP BASED ON THE WIRELESS APPLICATION PROTOCOL

(57) Abstract

Method, apparatus, memory card, and system for establishing a secure connection between a wireless communication apparatus and a data communication apparatus based on a wireless application protocol. The wireless communication apparatus is provided with contact means for receiving information from a separate unit provided with memory means. The memory means comprising information to control the access of the wireless communication apparatus through a wireless communication network connected to said data communication apparatus.
